

Oncomine Precision Assay on the Genexus System

Leading-Edge Pan-Cancer NGS Testing

Genomic profiling of a tumor to characterize clinically relevant variants has become critically important for cancer diagnosis and prognosis, as well as in driving therapeutic decision making. There is a growing need for rapid assessment of somatic variants in genes of key interest in oncology. The Oncomine™ Precision Assay on the Ion Torrent™ Genexus™ Sequencer (OPAGX) is an amplicon-based automated nextgeneration sequencing (NGS) assay that enables quick turnaround genomic profiling of biomarkers across 50 genes from solid tumor and liquid biopsy samples.

Focused Multi-Gene Panel

The Oncomine™ Precision Assay panel contains 50 genes and 2,769 unique variants, applicable to a wide range of tumor types for detection of SNV, Insertion-Deletion, Copy Number Alterations, and Fusions. FusionSync™ technology enables detection of novel fusions.

FFPE and Plasma

Minimal input of 10ng required for FFPE and 20 ng for cfTNA*

Ion AmpliSeq™ HD

Amplicon-based library preparation utilizing unique molecular tags allows for high sensitivity while requiring minimal sample input.

Genexus NGS System

The Genexus System is a seamless NGS solution requiring minimal user touchpoints, resulting in consistent performance and straightforward implementation to scale quickly across our global sites.

Sample input requirements

Nucleic acid	DNA/RNA <ul style="list-style-type: none">• FFPE: 35 ng at concentration of >1 ng/μL in a volume of 35 μL• cfDNA: \geq 30 ng in 20 μL volume
FFPE	<ul style="list-style-type: none">• Cumulative tissue area of \geq 200 mm² using 5 μm sections (or \geq 100 mm² using 10 μm sections). Tumor cell content recommendation is \geq 30% with a minimum of 20%• 4-16 5 μm sections or 2-8 10 μm sections (< 80 μm total thickness per sample)
Plasma	5 mL (a minimum of \geq 2 mL) of double spun plasma collected from either EDTA (processed within 4 hours of collection) or Streck cfDNA Blood Collection Tubes (BCT)
Whole blood	10 mL whole blood samples collected in Streck cfDNA BCT
